

The Ends Part 2

Comments about books

When a deadly disease called AIDS began spreading through the United States, people criticized government leaders for not doing enough to stop it.

Protesters chanted and shouted outside Dr. Fauci's office. He invited some of them inside to talk so they could work together to find solutions.

Every new disease was a mystery to wonder about, a problem to solve. Where had it come from? How did it spread? How could it be prevented until researchers found a cure or a vaccine?

. Dr . Fauci's 2019 **Ebola** study proved that remdesivir ,

that might compete with remdesivir? Might it have something to with NIAID and CDC having just spent \$79 million² developing remdesivir for Gilead, a company in which the Bill & Melinda Gates Foundation owns a \$6.5 million stake?^{3,4} The BMGF is engaged in other large drug development deals with the company, including a cofunded \$55 million investment in a malaria treatment being developed by Lyndra Therapeutics. Gates has also funded the promotion of Gilead's Truvada in Kenya.^{5,6} Another Gilead partner, the US Army Medical Research Institute of Infectious Diseases at Ft. Detrick, Maryland (USAMRIID), where the drug was studied in monkeys, also contributed millions to remdesivir's development.⁷ At the outset of the coronavirus plague, remdesivir was just another pharma-owned molecule that FDA had never approved as safe and efficacious for any purpose. In 2016, remdesivir demonstrated middling antiviral properties against Zika, but the disease disappeared before the expensive non-remedy got traction.⁸ After the Zika threat vanished, NIAID put some \$6.9 million into identifying a new pandemic against which to deploy remdesivir. In 2018, Gilead entered remdesivir in a NIAID-

funded clinical trial against **Ebola** in Africa.⁹

This is how we know that Anthony Fauci was well aware of remdesivir's toxicity when he orchestrated its approval for COVID patients. NIAID sponsored that project. Dr. Fauci had another NIAID-incubated drug, ZMapp, in the same clinical trial, testing efficacy against **Ebola** alongside two experimental monoclonal antibody drugs. Researchers planned to administer all four drugs to **Ebola** patients across Africa over a period of four to eight months.^{10,11}

However, six months into the **Ebola** study, the trial's Safety Review Board suddenly pulled both remdesivir and ZMapp from the trial.¹² Remdesivir, it turned out, was hideously dangerous. Within 28 days, subjects taking remdesivir had lethal side effects including multiple organ failure, acute kidney failure, septic shock, and hypotension, and 54 percent of the remdesivir group died—the highest mortality rate among the four experimental drugs.¹³ Anthony Fauci's drug, ZMapp, ran up the second-highest body count at 44 percent. NIAID was the primary funder of this study, and its researchers published the bad news about remdesivir in the *New England Journal of Medicine* in De-

researchers pitilessly observed, “was that overall mortality while receiving the study drug was significantly higher in the daily Dapsone group.” NIAID researchers shrugged off the deaths as a mystery: “This finding remains unexplained.”²⁰

Vera Sharav spent years investigating Dr. Fauci’s torture chambers as part of her lifelong mission to end cruel medical experimentation on children. Sharav told me, “Fauci just brushed all those dead babies under the rug. They were collateral damage in his career ambitions. They were throw-away children.” Sharav said that at least eighty children died in Dr. Fauci’s Manhattan concentration camp and accused NIAID and its partners of disposing of children’s remains in mass graves.

BBC’s heartbreaking 2004 documentary, *Guinea Pig Kids*,²¹ chronicles the savage barbarity of Dr. Fauci’s science projects from

the perspective of the affected children. That year, BBC hired investigative reporter Celia Farber to conduct field research for the film, which exposes the dark underside of Big Pharma’s stampede to develop lucrative new AIDS remedies. “I found the mass grave at Gate of Heaven cemetery in Hawthorne, New York,” she told me. “I couldn’t believe my eyes. It was a very large pit with AstroTurf thrown over it, which you could actually lift up. Under it one could see dozens of plain wooden coffins, haphazardly stacked. There may have been 100 of them. I learned there was more than one child’s body in each. Around the pit was a semi-circle of several large tombstones on which upward of one thousand children’s names had been engraved. I wrote down every name. I’m still wondering who the *rest* of those kids were. As far as I know, nobody has ever asked Dr. Fauci that haunting question.

“I remember the teddy bears and hearts in piles around the pit and I recall the flies buzzing around. The job of recording all those names took all day. NIAID, New York, and all the hospital PIs were stonewalling us. We couldn’t get any accurate estimate of the number of children who died in the NIAID experiments, or who they were. I went to check the gravestone names against death certificates at the NYC Department of Health, which you could still do at that time. BBC wanted to match these coffins to the names of children who were known to have been at ICC. It was a very slow, byzantine project with tremendous institutional resistance, but we did turn up a few names. We learned the story of a father who had come out of prison looking for his son. He was told his son had died at ICC of AIDS and there were no medical records, as they’d all been ‘lost in a fire.’ He was devastated. This story ran in the *NY*

GUINEA PIG KIDS

This website is dedicated to **Guinea Pig Kids** - a BBC documentary that exposes how the city of New York has been forcing HIV-Positive children under its supervision to be used as human guinea pigs in tests for experimental AIDS drug trials. (This is a slightly edited version of the complete documentary that was broadcast on Tuesday, 30 November, 2004, at 1930 GMT on BBC Two in the UK.)
